Skills

Front-End: HTML, CSS, Sass, JavaScript

Back-End: Ruby, Rails, Sinatra

Tools: Git, GitHub, Heroku

Also some experience with:

Bootstrap, jQuery, APIs, and WordPress

Education

The New York Code + Design Academy
Philadelphia, PA | Certificate | 2018
Web Development Intensive

Trained in database theory, computer science, TDD, MVC, and OOP. Worked with other developers in a collaborative environment. Built individual and group projects from scratch, using dynamic and responsive design techniques.

Projects

ParkSmart - GitHub | Live
Community-based app that allows users to rent out driveway space
- Sass and Bootstrap-styled web application
- Google Maps API geolocates address and displays pin on map
- Ruby on Rails for user, reservation, and parking spot CRUD
- Shrine for image attachments, SendGrid email confirmations
- JavaScript-based booking feature with jQuery Datepicker

SportsTracker - GitHub | Live
Social media-based sport tracker application
- HTML and Sass-styled web application
- Fully functional JavaScript sign in and sign up modals
- MySportsFeeds API renders previous game data and stats
- Ruby on Rails for user and comment CRUD
- PaperClip gem supports image attachment uploads
- Constructed the application with a team of four developers

Hangman Game - GitHub | Live
Fully functional "hangman" game that accepts user input
- HTML and CSS-styled webpage with JavaScript functionality
- Keypress from user allows letter to be entered with keyboard
- Pop-up alert box notifies user if they win or lose the game

Work Experience

Cintas Corporation - Route Service Sales Representative
July 2014 — December 2017
- Engaged in forward-facing customer interactions to build relationships with key decision makers
- Ensured company standards were met to meet daily deadlines and productivity metrics
- Managed and grew customer accounts, drove a truck along an established route
- Serviced and sold within an existing customer base, secured account renewals

McDonald's Restaurant - Assistant Manager
March 2011 — July 2014
- Direct supervisor for 30 employees at a $2 million high-volume fast food restaurant
- Delivered quality service during peak sales of up to $2,000 per hour with hundreds of guests
- Maintained labor cost and food waste to increase store profitability by keeping margins low
